

BACKGROUND INFORMATION: NATIONAL PRIORITIES LIST, PROPOSED UPDATE #6

At this time, the U.S. Environmental Protection Agency (EPA) is proposing 64 sites, including 1 Federal facility, as Update #6 to the National Priorities List (NPL). The update includes sites from 24 of the 50 States, the District of Columbia, and 6 Territories. Pennsylvania leads with 15 sites, followed by Virginia with 6. This proposal brings to 248 the number of sites proposed for the NPL. Adding the 703 sites already on the NPL brings the total to 951.

The NPL identifies the targets for long-term "remedial action" under the "Superfund" law, the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) as amended by the Superfund Amendments and Reauthorization Act (SARA), enacted on October 17, 1986. The laws provide a Trust Fund to pay costs not assumed by responsible parties for corrective actions at abandoned or uncontrolled hazardous waste sites that threaten public health or the environment. EPA has the primary responsibility for managing cleanup and enforcement activities under Superfund.*

To date, EPA has inventoried almost 26,000 uncontrolled hazardous waste sites. Some require emergency action because they represent an immediate threat. EPA cleans up such sites promptly through its "removal" program. As of December 1, 1986, EPA had undertaken 819 removal actions, of which 194 were at NPL sites where initial cleanup measures were required. To be eligible for a long-term remedial action under Superfund, however, a site must be included on the NPL.

The 64 Update #6 sites are proposed for the NPL on the basis of their scores on the Hazard Ranking System (HRS), a numerically based system designed to evaluate the relative risks posed by a site to public health or the environment. Section 105(c) of SARA requires that the HRS be revised by April 1988. All Update #6 sites received HRS scores of 28.50 or above on the existing HRS and will not be reevaluated using the revised HRS.

Prior to Proposed Update #6, 887 sites were on or proposed for the NPL. These sites can be grouped in the following way:

- 703 final sites
- 184 proposed sites (including 2 from Update #1, 86 from Update #2, 24 from Update #3, 27 from Update #4, and 45 from Update #5)

One site in Update #4, Silver Creek Tailings in Park City Utah was removed from proposed status on October 17, 1986, as required by section 118(p) of SARA.

* For a more detailed description of the NPL process, see ~~ZUMA 10001 HD 00~~ "National Priorities List, Fact Book" (June 1986), Publication HW-7-3. A single free copy is available from EPA's Public Information Center, 4PM-211B, 401 M St., S.W., Washington, D.C. 20460 (telephone 800-828-4445 or 646-6410 in Washington, D.C.).

This document provides background information on proposed additions to the NPL and includes the following lists:

- ° The 64 sites in Proposed Update #6, arranged in two ways: alphabetically by State and in groups according to their scores on the HRS; the Federal facility is in a separate section.
- ° The 951 final and proposed sites arranged alphabetically by State.
- ° The distribution of sites by State, arranged in two ways: by number of proposed Update #6 sites and by the total number of sites (final and proposed).

RCRA-Related Sites

In November 1984, the Hazardous and Solid Waste Amendments were enacted, expanding EPA's authority to require corrective measures under Subtitle C of the Resource Conservation and Recovery Act (RCRA). As a result of this broadened RCRA authority, EPA is revising its policy for placing RCRA-related sites on the NPL, and in June 1986, announced three major components of a final RCRA policy. The three are:

- ° The facilities are owned by persons who are bankrupt.
- ° The facilities have lost authorization to operate, and there are additional indications that the owners or operators will be unwilling to undertake corrective action.
- ° Sites, analyzed on a case-by-case basis, whose owners or operators have shown an unwillingness to undertake corrective action.

In June 1986, EPA requested public comment on a proposal to add specificity to the third component. EPA will consider supplementing the final NPL/RCRA policy if comments or experience with the new policy demonstrate that additional categories of RCRA-related sites should be placed on the NPL to ensure appropriate and expeditious remedial action.

Proposed Update #6 includes four RCRA-related sites. Three are being proposed for the NPL on the basis of the first component:

- ° Parsons Casket Hardware Co., Belvidere, Illinois
- ° Allied Plating, Inc., Portland Oregon
- ° Palmetto Recycling, Inc., Columbia, South Carolina

One RCRA-related site is being proposed on the basis of the second component:

- ° Chem-Solv, Inc., Cheswold, Delaware

Federal Facilities

Section 120(a) of SARA requires that Federal facilities be subject to and comply with CERCLA in the same manner as any nongovernmental entity. In addition, listing Federal facilities is consistent with the NPL's purpose of informing the public about sites that present potential hazards. CERCLA section 111(e)(3), however, prohibits use of the Trust Fund for remedial actions at Federally-owned facilities.

Update #6 proposes one Federal facility:

- Twin Cities Air Force Reserve Base (Small Arms Range Landfill), Minneapolis, Minnesota

Description of Lists

Each entry in the two lists of proposed Update #6 sites (one arranged by two-letter State abbreviations and the other by group) contains the name of the site and the State and city or county in which it is located. Two additional types of information are provided:

- The group in which the proposed site would appear in the groups of 50 on the final NPL. For example, the sites in Group 8 of the proposed update have HRS scores that fall within the range of scores covered by the eighth group of 50 sites on the final NPL.
- One or more notations referencing the type of response and the status of cleanup activities.

Five response categories are used to designate the type of response underway. One or more categories may apply to each site. The five are:

R = Federal and/or State response

F = Federal enforcement

S = State enforcement

V = Voluntary or negotiated response

D = To be determined

For informational purposes, cleanup status is indicated where field activities are underway or completed. Many sites are cleaned up in stages or "operable units" -- that is, a discrete action taken as part of the entire site cleanup that significantly decreases or eliminates contamination, threat of contamination, or pathway of exposure. One or more operable units may be necessary before EPA considers the cleanup of a hazardous waste site completed. A simple action such as constructing a fence is not considered an operable unit for coding purposes.

Three cleanup status codes are used. (Only one code can be used at a site because the codes are mutually exclusive). The three codes are:

I = Implementation activities are underway for one or more operable units.

O = Implementation activities are completed for one or more (but not all) operable units.

C = Implementation activities are completed for all operable units.

In the third list (951 final and proposed sites), all sites are arranged alphabetically by State. The list provides the date each site was proposed; the date the site became final and its position on the NPL; and for a site still in proposed status, its group in the final NPL.
