

Superfund and Enforcement Program Publications Update

Office of Emergency and Remedial Response
Office of Waste Programs Enforcement

Intermittent Bulletin
Volume 1 Number 2

Since the start of the hazardous waste cleanup program, the U.S. Environmental Protection Agency has studied more than 33,000 hazardous waste sites, issued scores of program guidance and technical manuals, and produced hundreds of fact sheets and explanatory documents. All this activity has made the Superfund and Enforcement programs a larger publishing enterprise than many private sector publishers.

The 1992 Compendium of Superfund Program Publications is the single most complete source of information produced by EPA on hazardous waste. With the Compendium, Superfund experts and nonexperts alike can obtain the latest publications or computer files covering every phase of the Superfund program. The publications and computerized data listed in the Compendium come from many program offices including:

- Office of Emergency and Remedial Response (OERR),
- Technology Innovation Office (TIO),
- Office of Waste Programs Enforcement (OWPE),
- Office of Air Quality Planning and Standards (OAQPS), and
- Office of Research and Development (ORD).

A copy of the Compendium can be obtained from the National Technical Information Service by calling 703-487-4650.

This bulletin supplements the Compendium by listing the OERR and OWPE publications issued from October 1991 through September 1992. Publications are organized in this bulletin by the same headings used in the Compendium. Recent publications can be found under:

Administration and Management	3
Enforcement (CERCLA)	6
Enforcement (RCRA)	7
Public Participation	7
Remedial Action	8
Removal Action	8
Site Assessment	11
Technology	12

For more information on publications not listed in this bulletin, please contact the RCRA/Superfund Hotline on 800-424-9346.

How To Order Publications

The National Technical Information Service (NTIS) has joined forces with EPA to ensure that citizen requests for information are filled rapidly at the lowest possible cost. NTIS is the repository of technical publications for the Federal Government, the largest single source for public access to federally-produced information, and is equipped to reproduce and distribute publications on a document-by-document or on a standing order basis. All publicly available Superfund publications and RCRA Enforcement publications can now be obtained through NTIS.

To be more responsive to the extensive public demand for hazardous waste publications, the NTIS has established expedient publication fulfillment procedures specifically for OERR and OWPE. Members of the public may obtain any publication in the Compendium from NTIS through several ordering methods.

The new NTIS Standing Order Service is the best way to stay current with program developments. Standing order customers automatically receive every Superfund publication and RCRA Enforcement publication issued by the OERR, OWPE, and the ORD during the year. Printing delays will not interfere with standing orders; NTIS reproduces the most important publications directly from camera-ready copy so crucial information is on its way before the finished documents leave the printer. Customers also can tailor their standing orders by receiving new publications in customer-selected categories:

- Program policies and administration
- Site assessment and remediation
- Removals and emergency response
- Technologies and analytical services
- Enforcement.

To arrange for automatic receipt of the latest Superfund and RCRA Enforcement publications, call the NTIS Standing Order Service at 703-487-4630. Publications also can be ordered on a document-by-document basis by calling the NTIS regular service line at 703-487-4650. When ordering publications through NTIS, please have the publication title and the NTIS publication number ready so that your order can be taken and filled without delay.

The Superfund Document Center is EPA employees' primary contact for obtaining Superfund publications. Document Center staff are available from 9:00 am to 4:00 pm EST, Monday through Friday, except holidays. EPA employees can order Superfund publications and RCRA Enforcement publications by calling 202-260-9760 or by faxing to 202-260-2596. Please include the OERR or OWPE publication number and your name, organization, and EPA mail code with your publication order.
