

SYMPOSIUM ANNOUNCEMENT

Symposium on Intrinsic Bioremediation of Ground Water

Hyatt Regency Denver Downtown, Denver, CO

August 30-September 1, 1994

BACKGROUND

A three-day symposium is being organized by the U.S. Environmental Protection Agency's Biosystems Technology Development Program and the U.S. Geological Survey, with sponsorship from the U.S. Air Force and U.S. Department of Energy.

Intrinsic bioremediation, the natural degradation of substances in ground water, can reduce concentrations of some important types of contaminants. This symposium will focus on state-of-the-science and regulatory requirements and will also provide an opportunity for exchange of information and views among the many parties interested in intrinsic bioremediation as a ground water treatment option.

AGENDA

Symposium presentations will examine the state-of-the-science of intrinsic bioremediation and regulatory issues associated with application of the technology. Presentations will focus on identifying the primary controls on intrinsic bioremediation and identifying the regulatory requirements for use of intrinsic bioremediation.

AUDIENCE

The symposium will be attended by the regulatory and regulated community and scientists working on all aspects of intrinsic bioremediation, including representatives of state and federal agencies and industry, academics, and contractors.

CALL FOR POSTER PAPERS

If you are interested in presenting a poster paper, please submit a 1- to 2-page abstract for consideration no later than **April 22, 1994**. A limited number of poster papers will be selected for presentation. Send your abstract to Helen Murray, Eastern Research Group, Inc. (ERG), 110 Hartwell Avenue, Lexington, MA 02173-3198, FAX: 617-674-2906. Please fill out the attached application form and submit it with your abstract. Abstracts selected for presentation at the symposium will be published. Preference will be given to abstracts submitted by state agencies and abstracts describing case studies of intrinsic bioremediation. It would be particularly helpful to provide data demonstrating removal of hydrocarbons.

REGISTRATION/INFORMATION

To register for the symposium, call Eastern Research Group, Inc. at 617-674-7374. For more information about the symposium, call Helen Murray at 617-674-7307.
