ABOUT EPA

EPA was created through an executive reorganization plan designed to consolidate certain Federal Government environmental activities into a single agency. The plan (Reorganization Plan No. 3 of 1970) was sent by the President to Congress on July 9, 1970, and EPA was established as an independent Agency in the Executive Branch on December 2, 1970.

EPA was formed by amalgamating 15 components from 5 departments and independent agencies. Water quality responsibilities were transferred from the Interior Department (the Federal Water Quality Administration) and the Department of Health, Education and Welfare (The Bureau of Water Hygiene). Other activities transferred from HEW included the National Air Pollution Control Administration and the Bureau of Solid Waste Management.

In addition, EPA acquired the Department of Agriculture's authority to register pesticides and to regulate their use; the Food and Drug Administration's authority to set tolerance levels for pesticides which occur in or on food and to monitor compliance with those limits; and a portion of the Department of Interior's pesticides research program.

Finally, EPA assumed some of the Atomic Energy Commission's and HEW's authority for setting environmental radiation protection standards. The Agency also absorbed the duties of the Federal Radiation Council.

Organizationally, EPA is headed by an Administrator, who is supported by a Deputy Administrator and six Assistant Administrators. Three of the Assistant Administrators are responsible for "functionalized" activities, i.e., activities which cut across all programs. These activities are planning and management, enforcement, and research. The remaining program activities have been grouped under three other Assistant Administrators on a media or pollutant basis, i.e., water and air pollution, noise, pesticides, radiation, solid waste, and toxic substances. The activities carried out by these offices are primarily policy development, standards and criteria development, and support and evaluation of regional activities.

EPA has established regional offices in conformance with the standard Federal regional boundaries and has assigned major responsibilities for carrying out EPA programs and policies to the regional offices. These include the authority to implement and enforce standards, to conduct monitoring and surveillance programs, and to provide technical and financial assistance to State and local Governments.

It also includes new and revised material for the period October-December 79. It contains additions/deletions to the list of general publications and new technical publications that are now available from the National Technical Information Service (NTIS).

The supplement also contains the current NTIS Price Code Sheet, a copy of NTIS order form A, and a copy of EPA form B. It includes an abbreviated citation for reports generated by EPA and its contractors and grantees. The citations are arranged by sections - general and technical and then by categories: air pollution, noise pollution, pesticides, radiation, solid waste, toxic substances, and water pollution. Within each category the citations appear in alphabetical order by title.

There is a single index by subject.

Copies of reports listed in the general section of each category are available in GPO depository libraries. Microfiche copies of all reports listed in the technical section of each category are available in each EPA Library.

To order documents or subscriptions assigned a PB number return the order Form A to the National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Do not order from the U.S. Environmental Protection Agency. If what you have ordered is in stock, you should receive your report within two weeks after the order arrives at NTIS. If what you have ordered must be reporduced from a microform, or if all the paper copies have been sold and reprints are in process, you should receive your order within four to six weeks. Prices for documents are indicated in each entry by a price code for paper copy and for microform. You must translate this code into dollars when sending your order to NTIS.
