A Quarterly Guide

ABOUT EPA

EPA was created through an executive reorganization plan designed to consolidate certain Federal Government environmental activities into a single agency. The plan (Reorganization Plan No. 3 of 1970) was sent by the President to Congress on July 9, 1970, and EPA was established as an independent Agency in the Executive Branch on December 2, 1970.

EPA was formed by amalgamating 15 components from 5 departments and independent agencies. Water quality responsibilities were transferred from the Interior Department (the Federal Water Quality Administration) and the Department of Health, Education and Welfare (The Bureau of Water Hygiene). Other activities transferred from HEW included the National Air Pollution Control Administration and the Bureau of Solid Waste Management.

In addition, EPA acquired the Department of Agriculture's authority to register pesticides and to regulate their use; the Food and Drug Administration's authority to set tolerance levels for pesticides which occur in or on food and to monitor compliance with those limits; and a portion of the Department of Interior's pesticides research program.

Finally, EPA assumed some of the Atomic Energy Commission's and HEW's authority for setting environmental radiation protection standards. The Agency also absorbed the duties of the Federal Radiation Council.

Organizationally, EPA is headed by an Administrator, who is supported by a Deputy Administrator and six Assistant Administrators. Three of the Assistant Administrators are responsible for "functionalized" activities, i.e., activities which cut across all programs. These activities are planning and management, enforcement, and research. The remaining program activities have been grouped under three other Assistant Administrators on a media or pollutant basis, i.e., water and air pollution, noise, pesticides, radiation, solid waste, and toxic substances. The activities carried out by these offices are primarily policy development, standards and criteria development, and support and evaluation of regional activities.

EPA has established regional offices in conformance with the standard Federal regional boundaries and has assigned major responsibilities for carrying out EPA programs and policies to the regional offices. These include the authority to implement and enforce standards, to conduct monitoring and surveillance programs, and to provide technical and financial assistance to State and local Governments.

FOREWORD

This Quarterly Guide to EPA Publications is designed to provide a complete listing of EPA reports, pamphlets and brochures available to the public from the Agency, the National Technical Information Service (NTIS) or the Government Printing Office. It contains an abbreviated bibliographic citation for reports generated by EPA and its contractors and grantees. The citations are arranged by sections - general and technical and then by categories: air pollution, noise pollution, pesticides, radiation, solid waste, toxic substances, and water pollution. Within each category the citations appear in alphabetical order by title.

There is a single index by subject.

Copies of reports listed in the general section of each category are available in GPO depository libraries. Microfiche copies of all reports listed in the technical section of each category are available in each EPA Library.

To order documents or subscriptions assigned a PB number return the order Form A (at the back of this issue) to the National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161.

Do not order from the U.S. Environmental Protection Agency. If what you have ordered is in stock, you should receive your report within two weeks after the order arrives at NTIS. If what you have ordered must be reproduced from a microform, or if all the paper copies have been sold and reprints are in process, you should receive your order within four to six weeks.

Prices for documents are indicated in each entry by a price code for paper copy and for microform. You must translate this code into dollars when sending your order to NTIS. A copy of the current Price Code is printed on the reverse of this page. The codes will be revised effective April 1, 1978. The revised listing may be obtained by contacting the NTIS, Input Branch, 703-557-4690.

HOW TO ORDER OTHER EPA REPORTS

To order EPA publications available for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, send money and your order to GPO. Items shown as available from EPA's Printing Management Office or Field activities will be provided as long as copies are available. To request these items, send Form B to the appropriate address listed on the inside back cover of this Guide.

HOW TO BE PLACED ON THE DISTRIBUTION

If you wish to receive future Quarterly Guides, return the address label on the reverse of the guide to the Printing Management Office or appropriate Field Activity.
