# College Profile Directory

## **To College Profile Directory Users**

This Directory is intended as a quick reference tool for use by EPA managers and supervisors in locating quality applicants to meet the hiring needs of their organization. It is for information only, and is not intended to limit recruitment to the colleges and universities contained herein. The Directory is primarily geared to disciplines which fall in the hard-to-fill category, e.g., environmental scientists, engineers, toxicologists, hydrologists, geologists, chemists and others.

The Directory lists a total of 59 colleges, universities and professional societies and organizations. Where possible, we have included information on the institution's profile in terms of its student enrollment and minority group make-up. We have also included information on upcoming recruiting events that are scheduled by the colleges and professional organizations. Many of these events have proved to be successful in the past for meeting Agency affirmative action goals.

We hope that this basic information will be of value in providing an initial picture of a school in relation to EPA's needs. If you are aware of any other institutions, organizations or events that should be added, please give us in the EPA Recruitment and Employment Center a call on 382-3305. We will make every effort to include them in our next update.

Leigh Diggs  
Coordinator of Recruitment
