

ENERGY STAR

USING THE ENERGY STAR IDENTITY TO MAINTAIN AND BUILD VALUE

PURPOSE

These guidelines outline the implementation of a strong and distinctive identity for ENERGY STAR. Whether you are labeling a product because it has earned the ENERGY STAR, designing a new outreach campaign or communicating your organization's environmental commitment, these guidelines are designed to help you make the most of your ENERGY STAR partnership. All of us have the power to make a change for the better if we work together.

MESSAGE FROM THE ADMINISTRATOR

ENERGY STAR is more than a label awarded for energy efficiency. It is a partnership among government, business, and consumers, united in the pursuit of a common goal—to protect our environment for future generations.

The ENERGY STAR program has been a resounding success over the last decade. Americans have purchased more than 1 billion ENERGY STAR qualified products and thousands of buildings have been improved. More than 7,000 businesses and organizations have become partners, and more than 40% of the American public recognizes the ENERGY STAR.

Last year alone, with the help of ENERGY STAR, Americans saved the energy required to power 15 million homes and reduced air pollution equivalent to taking 14 million cars off the road—all this while saving \$7 billion on energy bills. Through ENERGY STAR, we have successfully educated our partners and the consumer marketplace that energy efficiency does not sacrifice the features, style, or the comfort that today's consumers expect. But there is

much more to do. There are many more Americans to make aware of the power they have when they make choices for their homes and many more businesses to show that what is good for the environment is also good for the bottom line.

The quality of the environment is everyone's responsibility and by bringing ENERGY STAR into American homes and businesses we can make an enormous difference.

In the following pages, we define and provide new tools that will help your organization build on our joint accomplishments of the past and to help us deliver a better future—one that will benefit generations to come.

Christie Whitman
Administrator
Environmental Protection Agency

*THE ENERGY STAR IS MORE THAN A
LABEL AWARDED FOR ENERGY
EFFICIENCY*

THE POWER OF ENERGY STAR

ENERGY STAR has become a powerful platform for improving the environment through energy efficiency.

THE HISTORY

EPA introduced the ENERGY STAR label in 1992 to recognize energy-efficient computers. Since then, the label has grown to identify efficient products across more than 40 product categories. Since the mid-1990s, EPA has collaborated with the U.S. Department of Energy (DOE), which now has responsibility in some product areas. EPA approved the label for use on efficient new homes in 1995, and efficient buildings became eligible for the label in 1999 when EPA unveiled a new standardized approach for measuring the energy performance of an entire building.

Beyond the label, EPA and DOE have offered many tools and materials to partner organizations to build upon and use in their efforts to promote energy efficiency. These include:

- promotional ENERGY STAR marks;
- national public service advertising campaigns;

- promotional and national campaign materials;
- performance rating systems;
- sales training materials;
- educational brochures;
- awards in recognition of excellence.

THE SUCCESS

Since the introduction of the ENERGY STAR label, Americans have purchased more than 1.5 billion products carrying that mark and improved the efficiency of thousands of buildings and homes. As a nation we have prevented greenhouse gas emissions equivalent to those from 20 million vehicles.

Over this time the public has become more aware of and interested in energy efficiency, ENERGY STAR, and protecting the environment. Energy issues have made news. The public has become more concerned with environmental issues, particularly air pollution and global warming. Many consumers want to know what they can do to save energy and protect the environment and believe that products that address energy and environmental issues

ENERGY STAR HAS BECOME A POWERFUL PLATFORM FOR IMPROVING THE ENVIRONMENT THROUGH ENERGY EFFICIENCY

are desirable (see Survey Results on page 2.2).

ENERGY STAR is growing to meet these consumer and business interests. Recent surveys and studies show (see pages 2.2-2.4 for more complete results):

- More than 60% of the American public is aware of the label;

- The ENERGY STAR label is influencing product purchasing and consumers will use the label in the future as part of their purchasing decisions;
- Market penetration of ENERGY STAR qualified products has increased substantially in regions with active programs;
- ENERGY STAR partners that are leaders in corporate energy management are strong performers on Wall Street.

87% AMERICANS ARE VERY CONCERNED ABOUT THE ENVIRONMENT

AMERICAN VIEWS ON ENERGY, ENVIRONMENT AND PRODUCTS

Many Americans are concerned about the environment and believe that saving energy helps the environment.

- 89% strongly agree or agree with the statement "I'm very concerned about the environment."^A
- 93% strongly agree or agree with the statement "Saving energy helps the environment."^A
- 93% of people believe that saving energy is important.^B
- 94% of consumers believe that each of us has to be responsible in our energy use and that they as an individual can make a difference (they either agree or strongly agree).^A
- 73% of consumers believe that "A product that is better for the environment" is a somewhat to very important consideration when purchasing an appliance or other energy-using product.^A
- 72% of adults "...make a special effort to look for products that are energy efficient."^C

AMERICAN VIEWS ON THE FEDERAL GOVERNMENT AND ENERGY STAR

There is growing awareness of the ENERGY STAR label, with more than 60% of the American public recognizing it.^D

Of those consumers aware of the ENERGY STAR label, many have a good understanding of it.^A

- 89% believe a qualified product uses energy more efficiently than a conventional product.^A
- 72% believe a qualified product is friendly to the environment.^A

The ENERGY STAR label is influencing purchases of efficient products.

- More than 50% of households knowingly purchased at least one ENERGY STAR qualified product in the last twelve months.^D
- Of those with a recent ENERGY STAR purchase:
 - more than 60% say that the presence of the ENERGY STAR mark influenced their purchase decision (either somewhat or very much);^{A,D}

MORE THAN 60% OF THE AMERICAN PUBLIC RECOGNIZE THE ENERGY STAR

ENERGY STAR QUALIFIED PRODUCTS ARE GAINING MARKET SHARE

- 93% of those that received a discount said that they were either very or somewhat likely to purchase the ENERGY STAR qualified product without the discount.^D

Many Americans believe they will use the ENERGY STAR label in the future to help in choosing products.

- 95% of recent purchasers of an ENERGY STAR qualified product say they are somewhat or very likely to purchase an item with the ENERGY STAR mark in the future.^A
- 76% of consumers that knowingly purchased an ENERGY STAR labeled product are very or somewhat likely to recommend ENERGY STAR to a friend.^D

The market share of ENERGY STAR qualified products is growing all over America.

In California:

- Market share of major appliances carrying the ENERGY STAR grew by 12 to 28%;^E
- Sales of ENERGY STAR qualified Compact Fluorescent Lamps (CFLs) reached nearly 2.8 million by mid 2001.^F

In the Northwest:

- Market share for ENERGY STAR qualified windows grew from 15% in 1997 to 66% by June 2001;^G
- ENERGY STAR qualified clothes washers reached a 30% market share;^H
- 8.3 million ENERGY STAR qualified CFLs were sold in 2001.^H

In the Northeast:

- Market share of ENERGY STAR qualified clothes washers is 65% greater than the national average.^I

67% BELIEVE A QUALIFIED PRODUCT USES ENERGY MORE EFFICIENTLY THAN A COMPARABLE MODEL

SUPERIOR ENERGY MANAGEMENT STANDS OUT ON WALL STREET

Energy efficiency leaders (companies that improve the efficiency of their own operations) achieve superior stock market returns.

- In the real estate sector, active ENERGY STAR partners outperformed non-partners by 12% over a 2 year period.^j

- In the food service sector, ENERGY STAR partners outperformed to the Dow Jones broad retail sector index by 2000 basis points over a 2 year period.^k

THE FUTURE

There is much more work to do over the coming years on improving the environment through energy efficiency. Based on the recent surveys and studies, as well as a thorough review of the use of the ENERGY STAR marks in today's market place, it is clear that there are several measures that can make ENERGY STAR more effective as we go forward. The improvements are as follows:

- Building a strong call to action into the ENERGY STAR identity that speaks to the individual both emotionally and rationally about their ability to make a change for the better;

- Building clearer statements about the EPA and DOE backing of ENERGY STAR into promotional campaigns and outreach materials so that consumers are not confused about its source and can trust the ENERGY STAR as credible, unbiased information;
- Updating the ENERGY STAR marks to be more memorable, recognizable and clearer across a range of applications.

These improvements will help increase awareness of ENERGY STAR and will more strongly influence the change in behavior required to protect the environment for future generations.

THE ENERGY STAR IDENTITY

The ENERGY STAR identity is a valuable asset, and like any asset with appreciable value, it must be properly used and protected. These guidelines will help us all understand and properly use the key elements of the ENERGY STAR identity. Consistently presenting the meaning and benefits of ENERGY STAR maintains and builds its value and immeasurably benefits all.

Several refinements have been made to enhance the value of the ENERGY STAR identity. First, the ENERGY STAR marks have been updated to have greater clarity, consistency and consumer recognition. The update includes adding the words "ENERGY STAR" into each mark so that it is closely associated with the ENERGY STAR name. We have also incorporated the power of a strong, clear color, one of the most important elements of an identity if used consistently and frequently. Blue has been chosen as the primary color for the marks because it represents many positive attributes for ENERGY STAR including clarity, air, sky, and the environment. ENERGY STAR Blue (100% Cyan) is the preferred color for the use of the marks.

The refined ENERGY STAR marks:

- work better across a range of sizes and backgrounds, and particularly well in retail settings;
- maintain a strong environmental feel with ENERGY STAR Blue;
- read as ENERGY STAR due to the words underneath;
- reproduce easily due to a one color rendering (100% Cyan) in most applications.

In addition, EPA recommends that strong messaging about the power of the individual to protect the environment as well as clear statements about the government as the authority behind ENERGY STAR be incorporated into outreach materials, as appropriate, to more fully communicate the ENERGY STAR identity.

TIMING

The updated ENERGY STAR marks will appear in the marketplace beginning in early 2003. EPA encourages use of the new marks as soon as possible. We understand that partners will need sufficient time to use up existing stocks of materials to smoothly transition to the use of the new marks.

THESE GUIDELINES

The rest of these guidelines outline how to use the ENERGY STAR marks across a wide range of activities and applications. General guidelines are provided first, followed by more specific guidelines for each category of mark. In addition, these guidelines

provide recommendations for what words to use when writing or talking about the ENERGY STAR program (see pages 10.0-10.2), including how to reference the government source of authority.

USING THE ENERGY STAR MARKS

GENERAL GUIDELINES

The ENERGY STAR Program is a partnership between businesses and organizations and the Federal government. As part of this partnership, businesses and organizations can use the ENERGY STAR name and marks, registered marks owned by the U.S. government, as part of their energy efficiency and environmental activities.

The ENERGY STAR marks, each designed for specific purposes, are shown on the following pages and fall under the following four categories:

- 1. Promotional Mark;
- 2. Certification Mark;
- 3. Linkage Phrase Mark (2 options);
- 4. Partnership Mark.

Organizations must enter into an agreement with the government to use the marks as provided in this document. Allowing alterations to these marks would confuse businesses and consumers about the source of the ENERGY STAR program and reduce its value for all.¹

¹ Government documents may use slight variations of the ENERGY STAR marks where it is important to the communication goal of the material and where there would be no confusion about the source of authority.

Organizations using these marks must abide by the following general guidelines:

- 1. The ENERGY STAR name and marks may never be used in any manner that would imply EPA or DOE endorsement of a company, its products, or its services. Neither the marks nor the ENERGY STAR name may be used in any other company name, product name, service name, domain name or Web site title.
- 2. The marks may not be altered, cut apart, separated, or otherwise distorted in perspective or appearance.
- 3. The marks may never be used in a manner that would disparage ENERGY STAR, EPA, DOE, or any other government body.
- 4. The marks may never be associated with products, homes, or buildings that do not qualify as ENERGY STAR.
- 5. Partners and other authorized organizations are responsible for their own use of the ENERGY STAR marks, as well as use by their representatives, such as ad agencies and implementation contractors.

USING THE ENERGY STAR MARKS

GENERAL GUIDELINES

- 6. The ENERGY STAR name should always appear in capital letters.
- 7. The registration symbol ® must be used with the first time the words “ENERGY STAR” appear in material and:
 - The ® symbol should always be in superscript;
 - There shall be no space between the words “ENERGY STAR” and the ® symbol;
 - The ® symbol shall be repeated in a document for each chapter title or Web page.

ENERGY STAR REVIEW POLICY

- Advertisements where the certification mark is placed next to qualified products do not need to be approved.
- EPA must approve any major educational or promotional campaigns that feature the ENERGY STAR name or mark prior to final production or printing. The submitted materials will be reviewed for consistency with these guidelines within two (2) business days of receipt of the materials. Materials should be submitted to your Account Manager or primary program contact.

MARK VIOLATIONS

EPA actively monitors proper use of the ENERGY STAR name and marks. The following explains the general course of action for addressing mark violations:

- 1. Anyone who misuses the marks will be contacted in writing or by telephone.
- 2. A reasonable amount of time will be given to correct the error(s) per EPA’s discretion. The time frame will be dependent upon the medium in which the violation appeared and the severity of the violation.
- 3. Follow-up will be conducted to ensure that the error(s) has been corrected. Failure to make the required changes may result in termination of a stakeholder’s participation in ENERGY STAR and/or legal action.

QUESTIONS ABOUT USING THE MARKS

If you have questions regarding the use of the marks, please call your Account Manager or primary program contact, or the ENERGY STAR Hotline at: 1-888-STAR-YES (1-888-782-7937)

THE ENERGY STAR MARKS

Promotional Mark

Use the Promotional Mark on any materials that feature ENERGY STAR such as brochures, media kits and flyers. It is to be used in public education campaigns on the benefits of ENERGY STAR.

Certification Mark

Use the Certification Mark as a label on products, homes, and buildings that meet or exceed ENERGY STAR performance guidelines.

See special applications:
Insulation (pages 9.2-9.3);
HVAC (pages 6.6-6.7).

Linkage Phrase Mark

Use the Linkage Phrase Mark in marketing materials, such as ads and circulars, to show that a company sells either ENERGY STAR qualified products or services that can deliver ENERGY STAR performance levels.

Partnership Marks

Use the Partnership Mark to promote an organization’s commitment to and partnership in the ENERGY STAR Program.

Preferred

Optional

Preferred

Optional

Preferred

Optional

USING THE ENERGY STAR PROMOTIONAL MARK

Use the ENERGY STAR Promotional Mark on materials designed to convey the benefits of ENERGY STAR qualified products, homes, and buildings. It may be used on any promotional materials that feature ENERGY STAR, like point-of-purchase displays, advertisements, T-shirts and hats. This mark is available to organizations running public education campaigns on the benefits of ENERGY STAR, in particular:

- Any organization that has signed a Partnership Agreement or Partnership Letter with ENERGY STAR and wishes to promote the benefits of ENERGY STAR;
- Non-governmental organizations (NGOs) and trade associations seeking to promote the benefits of ENERGY STAR.

Examples of common uses of the Promotional Mark are provided in the following pages. They illustrate our recommendations (see pages 5.1-5.15) for getting the greatest value from the use of the Promotional Mark. We devote a special section to depicting recommendations for promotional and educational campaign materials, since they frequently allow for the integration of many elements of the ENERGY STAR identity (see pages 5.8-5.15).

Uses of the Promotional Mark include:

- T-shirts, hats, etc; **1**
- Point of Purchase materials; **2**
- Product advertising when one does not want to highlight the particular products that have qualified for the ENERGY STAR (when the Certification Mark would be appropriate); **3**
- Web sites; **4**
- New Home promotional materials; **5**
- Promotional and Educational Campaign materials. **6 7**

1

2

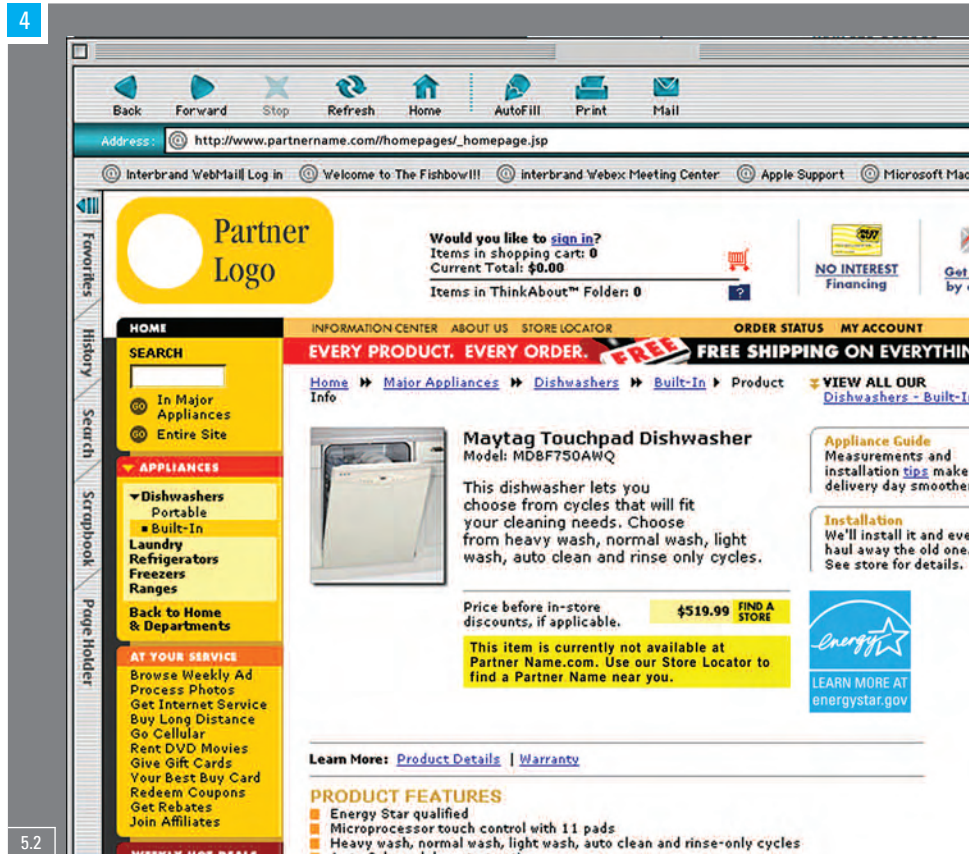

3

5

5.2

In examples 6 7 the Partner Promotional materials illustrate the use of the Promotional Mark on the inside of a brochure where there is only product marketing copy. When additional product specification is used, we suggest the addition of a building block containing the copy,

"Products that earn the ENERGY STAR prevent greenhouse gas emissions by meeting strict energy efficiency guidelines set by the U.S. Environmental Protection Agency and the U.S. Department of Energy."

6

7

5.3

USING THE ENERGY STAR PROMOTIONAL MARK

HORIZONTAL AND VERTICAL VERSIONS ¹

We created two versions of the Promotional Mark, each including the ENERGY STAR symbol block and an attached messaging block ². The messaging block devotes significant space to the call to action, which is important to building a stronger emotional appeal for the symbol. The two blocks are separated by a white rule equal in thickness to the arc within the symbol. The mark also has a white keyline around it that is also equal in thickness to the arc within the symbol.

CLEAR SPACE ¹

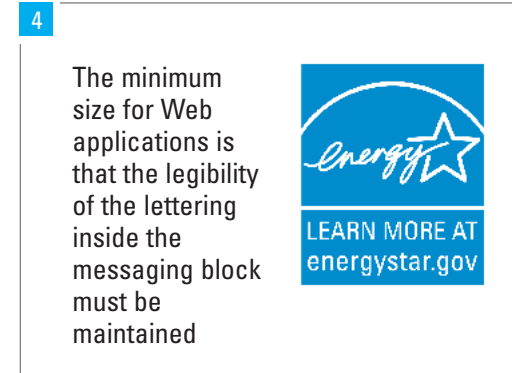

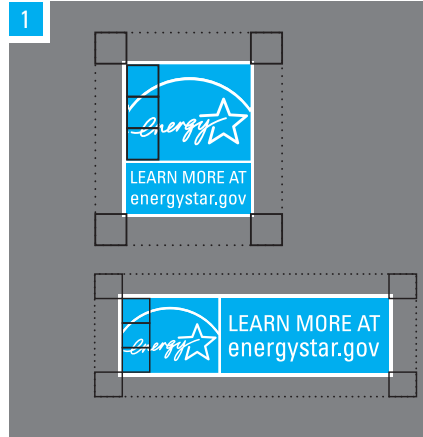

We require that a clear space of .333 (1/3) the height of the graphic box within the mark should surround the mark at all times. No other graphic elements, such as text and images can appear in this area. We require this clear space since the Promotional Mark frequently appears within materials using complex imagery such as other marks, graphic devices and text.

MINIMUM SIZE ³ ⁴

The solid color with white graphics and keyline assure a high level of protection for the mark itself. The mark may be resized, but the proportions must be maintained. For legibility in print, we recommend that the symbol block within the mark not be reproduced smaller in width than .375 inch (3/8") for print. Lettering legibility inside the mark must be maintained on the Web.

PREFERRED COLOR ⁵

The preferred color for the Promotional Mark is ENERGY STAR Blue (100% Cyan). Alternate versions in black or reversed out to white are allowed. The preferred application of the Promotional Mark is ENERGY STAR Blue, as shown in these examples. It demonstrates how clear, strong and easy-to-remember simple geometry combined with a strong color can be. The Web color equivalent of ENERGY STAR Blue is hex color #0099FF. If multicolor printing is available for advertising, product literature, etc. the Promotional Mark should be printed in ENERGY STAR Blue. If ENERGY STAR Blue is not available then black can be substituted.

USING THE ENERGY STAR PROMOTIONAL MARK IN PROMOTIONAL AND EDUCATIONAL CAMPAIGNS

When designing materials for use in promotional and educational campaigns, there is frequently more space available than is required by the Promotional Mark alone to convey the benefits of ENERGY STAR to business and consumers. This section outlines the messages that EPA believes are important to emphasize, as space allows. It also details the overall framework for incorporating these messages and demonstrates the direction EPA and DOE are taking as we develop template materials for such activities.

MESSAGES

EPA and DOE have had much success over the last two years incorporating a strong environmental message around the direct, rational benefits that ENERGY STAR offers, like energy savings, quality and comfort. EPA and DOE intend to continue to develop outreach materials that convey this full range of benefits.

The government will be incorporating three broad messages into our materials and are recommending that ENERGY STAR partners do the same, to the extent possible. The three broad messages are:

1. The power of the individual in making a difference;
2. The environmental choice provides energy savings without compromising quality or comfort;
3. ENERGY STAR is a government-backed symbol providing valuable, unbiased information to business and consumers.

1. THE POWER OF THE INDIVIDUAL
IN MAKING A DIFFERENCE
2. THE ENVIRONMENTAL CHOICE
PROVIDES ENERGY SAVINGS
WITHOUT COMPROMISING
QUALITY OR COMFORT
3. ENERGY STAR IS A GOVERNMENT-
BACKED SYMBOL PROVIDING
VALUABLE, UNBIASED
INFORMATION TO BUSINESS
AND CONSUMERS

BUILDING BLOCKS

We use a powerful Building Block approach to convey the beneficial and motivational messages associated with ENERGY STAR. This approach offers a number of elements that can be combined and used across various applications for an effective outreach campaign. The elements include:

- Related Imagery; **1**
- Messaging block **2** on the emotional motivation and the power of the individual;
- Messaging block **3** on the government source of authority;
- ENERGY STAR Learn More Mark. **4**

Important messages, such as the source of authority for ENERGY STAR and strong environmental messages, can be linked to the ENERGY STAR symbol through the use of the Building Blocks and the color blue. Together they provide a much clearer statement of the ENERGY STAR platform that the partner is leveraging and bringing to its customers.

The rational benefits can be explained in the message block **5** written by the partner, providing the partner with a lot of flexibility in space and copy.

EPA has recommended imagery for these promotional efforts chosen with the intent of enhancing this emotional connection even further (see pages 5.16-5.19).

The image shows a magazine spread with an advertisement for ENERGY STAR. The advertisement features a couple standing in front of a house under construction. The house's wooden frame is visible, and the couple is smiling. The advertisement text is as follows:

Some builders in Las Vegas have a much better picture of the neighborhood they're creating. To learn more about them, visit www.NevadaEnergyStar.com.

EVERY ENERGY STAR® HOME KEEPS 4,500 POUNDS OF GREENHOUSE GASES OUT OF OUR AIR EACH YEAR

ENERGY STAR qualified homes not only help protect the environment, but they also provide lower utility bills, increased comfort, and durability.

Some that has earned the ENERGY STAR meets EPA's strict requirements for energy efficiency. This exemplary performance is verified by an independent third party. To learn more, visit www.energystar.gov.

ENERGY STAR LEARN MORE AT energystar.gov

BUILDING BLOCKS

The Building Blocks are created for use in partner communications and allow for flexibility in content and configuration. Some examples of this flexibility are using the:

- Promotional Mark by itself; **1** **2**
- Promotional Mark with the source of authority messaging block; **3**
- Promotional Mark with the source of authority, the emotional motivation (optional) and the power of the individual messaging block in a horizontal or vertical configuration; **4** **5**
- Promotional Mark with the source of authority, the emotional motivation and the power of the individual messaging block in a stand alone application. **6**

In addition, all configurations of the Building Blocks can be used in both 4-color printing and **6** black and white communications.

The Building Blocks appear in ENERGY STAR Blue in full-color printing and black in one-color printing. A thick white border equal to at least 3 times the thickness of the rule within the building blocks is recommended around the entire application layout that utilizes the Building Blocks as shown in these examples.

IMAGERY SUGGESTIONS

Imagery is a small but very important part of the ENERGY STAR identity. Since imagery will be selected by many different sources, we have defined specific attributes that can be used as a guide for imagery selection. In addition, images will often be used in many applications that will limit any selection to royalty-free imagery only. Imagery should be chosen that is suggestive of our goals—protecting our environment for future generations and collective participation by consumers and partners. Choose imagery that:

- has the suggestion or actual presence of sky including the presence of sky through a window if it is an interior shot;
- has the participation of an individual or individuals. Family situations are preferred;
- conveys activity rather than passivity;
- suggests positiveness;
- shows simplicity rather than complexity.

USING THE ENERGY STAR MARKS

INCORRECT USE OF THE PROMOTIONAL MARK

Please:

- Do not use on any product, home, or building to signify qualification with ENERGY STAR.
 - Do not use to imply that any product, service, or organization has met ENERGY STAR performance criteria.
 - Do not use on letterhead, business cards, and other stationery.
 - Do not use to denote ENERGY STAR partnership or endorsement.
 - Do not use to imply that the government is funding ENERGY STAR financing and mortgages.
 - Do not use in advertisements featuring non-qualified products, homes, or buildings.
 - Do not include on promotional materials on or adjacent to a non-qualified product, home, or building.
 - Do not use the ENERGY STAR symbol without the ENERGY STAR messaging block.
2. Do not change the colors of the mark.
 3. Do not distort the mark in any way.
 4. Do not alter the lock up of the mark.
 5. Do not place the mark on a busy image.
 6. Do not rotate the mark.
 7. Do not separate any of the mark's elements.
 8. Do not substitute any part of the mark.
 9. Do not use any other typeface to replace part of the mark.
 10. Do not violate the clear space of the mark.
 11. Do not skew the mark.
 12. Do not change the size of the mark lock up.
 13. Do not use the old tagline "Money Isn't All You're Saving."

When reproducing the marks please:

1. Do not make the mark an outline. Do not use a white mark on a white background.
14. Do not replace the approved wording.
15. Do not apply the ENERGY STAR marks in an unapproved color.
16. Do not let text run into the mark.

USING THE ENERGY STAR CERTIFICATION MARK

Use the Certification Mark as a label on products, homes and buildings that meet or exceed ENERGY STAR performance guidelines.

Examples of common uses of the Certification Mark are provided on the following pages. They illustrate our recommendations (see pages 6.0-6.3) on how to get the greatest value of the Certification Mark.

Uses of the Certification Mark include:

- On a qualifying product; **1**
- In product literature for a qualifying product; **2**
- On the Web to identify a qualifying product; **3**
- In advertisements where it is used near to or on a qualifying product; **4**
- On a qualifying new home; **5**
- On Point of Purchase materials; **6**
- One qualifying product packaging; **7** **8**
- On a qualifying building.

USING THE ENERGY STAR CERTIFICATION MARK

ONE VERSION ¹

Use only one version of the Certification Mark. We created this Certification Mark to maximize the footprint of the mark and for contrast and legibility. The mark includes an ENERGY STAR Symbol block and an attached messaging block. In the case of the Certification Mark the messaging is the ENERGY STAR name itself to reinforce the legibility of the symbol. The two blocks are separated by a white rule equal in thickness to the arc within the symbol. The mark also has a white keyline around it that is also equal in thickness to the arc within the symbol.

CLEAR SPACE ²

We require that a clear space of .333 (1/3) the height of the graphic box within the mark should surround the mark at all times. No other graphic elements, such as text and images can appear in this area. We require this clear space since the Certification Mark frequently appears on materials using complex imagery such as other marks, graphic devices and text.

MINIMUM SIZE ³

The solid color with white graphics and keyline assure a high level of protection for the mark itself. The mark may be resized, but the proportions must be maintained. For legibility, we recommend that the mark not be reproduced smaller in width than .375 inch (3/8") for print. Lettering legibility inside the mark must be maintained on the Web.

PREFERRED COLOR ⁴

The preferred color for the Certification Mark is ENERGY STAR Blue (100% Cyan). Alternate versions in black or reversed out to white are allowed. The preferred application of the Certification Mark is ENERGY STAR Blue, as shown in these examples. It demonstrates how clear, strong and easy-to-remember simple geometry combined with a strong color can be. The Web color equivalent of ENERGY STAR Blue is hex color #0099FF. If multicolor printing is available for advertising, product literature, or point of purchase materials the Certification Mark should be printed in ENERGY STAR Blue. If ENERGY STAR Blue is not available then the black can be substituted.

USING THE ENERGY STAR CERTIFICATION MARK SPECIAL CONDITIONS

ENERGY GUIDE LABEL 1 2

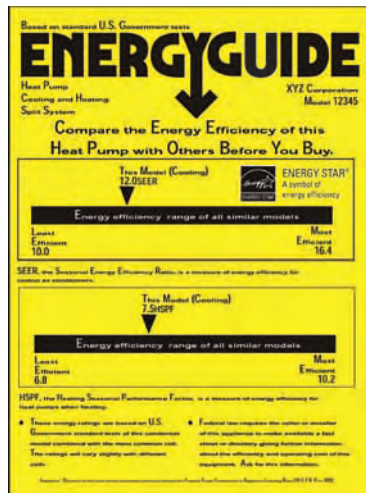

The Certification Mark has been approved by the Federal Trade Commission to appear on the Energy Guide label (required by the Department of Energy on all appliances and HVAC equipment). Given the format of the ENERGY STAR label, the Certification Mark appearing in black should be used.

HVAC EQUIPMENT 3

When using the ENERGY STAR Certification mark on or near a qualifying heat pump or central air conditioner, the following disclaimer 4 must appear: "This product meets ENERGY STAR requirements when appropriate coil components are used. Ask your contractor for details."

The illustrations on this page are additional examples of applying the Certification Mark and applying the disclaimer language.

Programmable Thermostats
Automatically adjust your home's temperature setpoint to help save energy when you're asleep or not at home. Within a few years, programmable thermostats will pay for themselves in energy saved by maintaining the highest or lowest required temperatures for four to five hours each day, rather than a full 24 hours.

ENERGY STAR qualified heating appliances can save 10-40 percent on heating bills and may also improve the comfort level.

Air Conditioners
Compared to conventional models, ENERGY STAR qualified central air conditioners and room air conditioners reduce energy waste by at least 10 percent, respectively. Replacing an old air conditioner with a new Energy Star qualified unit saves about \$50 per year in electricity depending on climate and the size of the unit you're replacing.

Boilers
An ENERGY STAR qualified boiler with technical specifications such as electric ignition and sealed combustion can save about 10 percent on heating bills.

Programmable Thermostats
Automatically adjust your home's temperature setpoint to help save energy when you're asleep or not at home. Within a few years, programmable thermostats will pay for themselves in energy saved by maintaining the highest or lowest required temperatures for four to five hours each day, rather than a full 24 hours.

4 This product meets ENERGY STAR requirements when appropriate coil components are used. Ask your contractor for details.

6.7

USING THE ENERGY STAR MARKS

INCORRECT USE OF THE CERTIFICATION MARK

- Please:
 - Do not use the Certification Mark on non-qualifying product, homes, or buildings.
 - Do not alter the Certification Mark by using the ENERGY STAR symbol without the messaging block containing the name "ENERGY STAR."
- When reproducing the marks please:
 - Do not make the mark an outline. Do not use a white mark on a white background.
 - Do not change the colors of the mark.
 - Do not distort the mark in any way.
 - Do not alter the lock up of the mark.
 - Do not place the mark on a busy image.
 - Do not rotate the mark.
 - Do not separate any of the mark's elements.
- Do not substitute any part of the mark.
 - Do not use any other typeface to replace part of the mark.
 - Do not violate the clear space of the mark.
 - Do not skew the mark.
 - Do not change the size of the mark lock up.
 - Do not use the old tagline "Money Isn't All You're Saving."
 - Do not replace the approved wording.
 - Do not apply the ENERGY STAR marks in an unapproved color.
 - Do not let text run into the mark.
 - Do not use only the symbol block. The messaging block must appear as well.
 - Do not delete the symbol block from the mark.

17	18		

USING THE ENERGY STAR LINKAGE PHRASE MARKS

Use the ENERGY STAR Linkage Phrase Marks in marketing and advertising material to show that a company carries ENERGY STAR qualified products or services that meet guidelines set by EPA. It may be used on an array of promotional materials that feature ENERGY STAR, like retail circulars, point-of-purchase displays, sales materials, T-shirts and hats, company-owned cars and vans, etc. There are two approved Linkage Phrase Marks offering the following message options:

- “ASK ABOUT ENERGY STAR”;
- “WE SELL ENERGY STAR.”

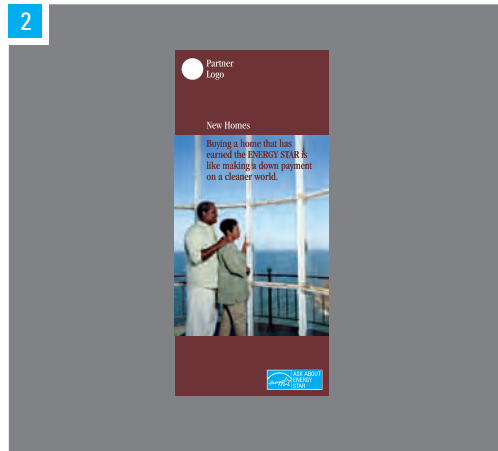

Any party interested in marketing ENERGY STAR qualified products or services that meet the strict guidelines set by EPA/DOE may use the Linkage Phrase Marks, once it enters into an agreement with EPA/DOE to abide by the terms of these Guidelines. A party is not required to sign a Partnership

Agreement or Partnership Letter. These marks were created particularly for dealers and distributors who work with ENERGY STAR manufacturing partners, HVAC and roofing contractors, remodelers, and other similar organizations.

Examples of many of these applications are provided in these pages and illustrate the recommendations, provided below, for getting the greatest value from the use of the Linkage Phrase Marks.

Uses of the Linkage Phrase Marks include:

- Promotional materials **2** or advertisements **1** in a general location that is not product-specific;
- Point of Purchase materials; **3**
- Web sites;
- Stationery such as letterhead, fax cover sheets, business cards, etc.

SAMPLE EXPLANATIONS FOR USE WITH THE LINKAGE PHRASE MARK

Use the following explanations to help educate consumers about ENERGY STAR in conjunction with the Linkage Phrase Marks:

- “Products/homes/buildings that have earned the ENERGY STAR® are designed to protect the

environment through superior energy efficiency.”

- “Choose energy-efficient products/ homes/buildings that have earned the ENERGY STAR®. It’s an easy way to protect the environment while also saving money.”

USING THE ENERGY STAR LINKAGE PHRASE MARKS

PLACEMENT

In advertisements, we prefer that the Linkage Phrase Mark appear at the top or bottom of the ad along with the organization name or in some other general location that is not product-specific. It is important to note that the mark must never be associated with any specific product models; use the Certification Mark for this purpose. If multiple models are featured in an advertisement and some of them do not meet the ENERGY STAR guidelines, the Linkage Phrase Mark may be used to indicate that ENERGY STAR qualified models are available without specifically identifying them.

TWO VERSIONS 1

We have created two versions of the Linkage Phrase Mark, each including the ENERGY STAR symbol block and an attached messaging block. The messaging block holds the linkage phrases that associate the user with ENERGY STAR qualifying product or services that meet ENERGY STAR performance guidelines. The two blocks are separated by a white rule equal in thickness to the arc within the symbol. The mark also has a white

keyline around it that is also equal in thickness to the arc within the symbol.

CLEAR SPACE 2

We require that a clear space of .333 (1/3) the height of the graphic box within the mark should surround the mark at all times. No other graphic elements, such as text and images can appear in this area. We require this clear space since the Linkage Phrase Mark frequently appears within materials using complex imagery such as other marks, graphic devices and text.

MINIMUM SIZE 3

The mark may be resized, but the proportions must be maintained. For legibility, we recommend that the graphic box within the mark not be reproduced smaller in height than .375 inch (3/8") for print. Lettering legibility inside the mark must be maintained on the Web. 4

PREFERRED COLOR 5

The preferred color for the Linkage Phrase Mark is ENERGY STAR Blue (100% Cyan). Alternate versions in black or reversed out to white are allowed. The Web color equivalent of ENERGY STAR Blue is hex color #0099FF.

INCORRECT USE OF THE ENERGY STAR LINKAGE PHRASE MARKS

Please:

- Do not use on any product, home, or building.
 - Do not use to imply that any organization has met the ENERGY STAR performance criteria.
 - Do not use to denote ENERGY STAR partnership or endorsement.
 - Do not use to imply that the government is funding ENERGY STAR financing and mortgages.
 - Do not use the ENERGY STAR symbol without the messaging block (containing the linkage phrase).
5. Do not place the mark on a busy image.
 6. Do not rotate the mark.
 7. Do not separate any of the mark's elements.
 8. Do not substitute any part of the mark.
 9. Do not use any other typeface to replace part of the mark.
 10. Do not violate the clear space of the mark.
 11. Do not skew the mark.
 12. Do not change the size of the mark lock up.

When reproducing the mark please:

1. Do not make the mark an outline. Do not use a white mark on a white background.
2. Do not change the colors of the mark.
3. Do not distort the mark in any way.
4. Do not alter the lock up of the mark.
13. Do not use the old tagline "Money Isn't All You're Saving."
14. Do not replace the approved wording.
15. Do not apply the ENERGY STAR marks in an unapproved color.
16. Do not let text run into the mark.

16

USING THE ENERGY STAR PARTNERSHIP MARK

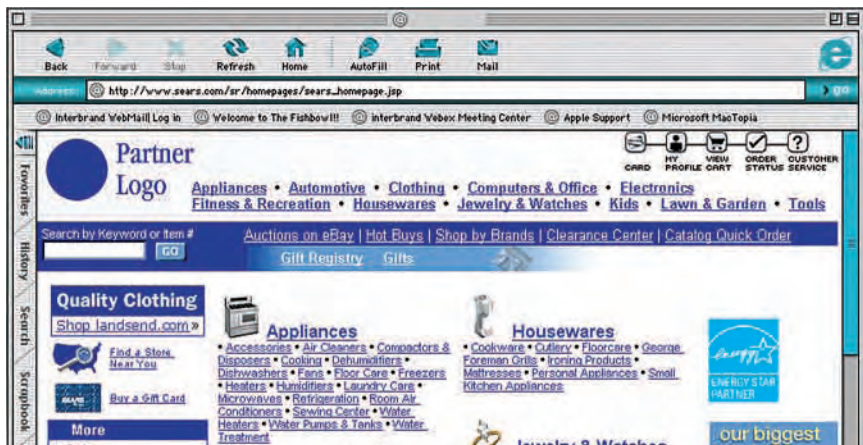

ENERGY STAR is united with its partners, manufacturers, retailers and builders, in the pursuit of a common goal—to protect our environment for future generations. More than 7,000 business and organizations have become partners. The Partnership Mark offers them an easy way to communicate their commitment to energy efficiency and the environment through ENERGY STAR. Any organization that has signed a Partnership Agreement or Partnership Letter with ENERGY STAR can use this mark to communicate their commitment.

Common uses of the Partnership Mark to feature the organization's partnership with EPA or DOE include:

- Stationery;
- Web sites; ¹
- Annual reports. ²

Examples of these applications are provided on these pages and illustrate the recommendations for getting the greatest value from the use of the Partnership Mark.

SPECIAL APPLICATIONS

ENERGY STAR HOME SEALING

MARKETING GRAPHIC

In addition to the ENERGY STAR marks, EPA has developed two graphics that may be used by interested parties to educate consumers about particular ways to improve the efficiency of their homes.

THE ENERGY STAR HOME SEALING MARKETING GRAPHIC

Use the ENERGY STAR Home Sealing Marketing Graphic to promote a set of products that, when used together, serve to seal a home's envelope and reduce energy use. The graphic may be used in marketing and advertising materials to educate consumers or to show that a company carries either products or services that clearly contribute to the improvement of the home envelope as recommended by EPA's ENERGY STAR Program. It must be placed in a general location that is not product-specific. It may not appear on products or product labels.

Any party may use this graphic once it enters into an agreement with EPA to abide by the terms of these Guidelines. A party is not

required to sign a Partnership Agreement or Partnership Letter.

We have created a horizontal and a vertical version of the Home Sealing Marketing Graphic ¹ ² to give organizations flexibility in use. The preferred color for the Home Sealing Marketing Graphic is ENERGY STAR Blue (100% Cyan). Alternate versions in black or reversed out to white are allowed. The reversed out white version may only be used on top of a dark background.

EPA must approve use of the Home Sealing Marketing Graphic as well as program facts that feature the ENERGY STAR name prior to final production or printing. The submitted materials will be reviewed for consistency with these guidelines within five (5) business days of receipt of the materials. Materials should be submitted to your primary program contact.

EPA recommends sealing air leaks and adding insulation to make your home more comfortable, reduce energy bills, and help our environment.

EPA recommends sealing air leaks and adding insulation to make your home more comfortable, reduce energy bills, and help our environment.

SPECIAL APPLICATIONS

ENERGY STAR HOME SEALING

MARKETING GRAPHIC

ENERGY STAR INSULATION PRODUCTS GRAPHIC

Use the ENERGY STAR Insulation Products Graphic to identify insulation products which qualify for ENERGY STAR. Only insulation manufacturers who have signed a Partnership Agreement may use the graphic.

The Insulation Products Graphic must appear directly on qualified insulation products or, where appropriate, ³ on product labels or packaging that is attached to or contains the actual insulation product. The insulation products graphic should never appear in advertisements or other promotional materials, print or electronic.

We have created a horizontal and a vertical version of the Insulation Products Graphic ¹ ² to give organizations flexibility in use. The preferred color for the Home

Sealing Graphic is ENERGY STAR Blue (100% Cyan). Alternate versions in black or reversed out to white are allowed. The reversed out white version may only be used on top of a dark background.

EPA must approve use of the Insulation Product Graphic as well as program facts that feature the ENERGY STAR name prior to final production or printing. The submitted materials will be reviewed for consistency with these guidelines within five (5) business days of receipt of the materials. Materials should be submitted to your primary program contact.

1

2

3

SPECIAL APPLICATION THE HOME PERFORMANCE WITH ENERGY STAR MARKETING GRAPHIC

Use the Home Performance with ENERGY STAR Marketing Graphic to promote a comprehensive, whole-house energy-efficiency improvement service in accordance with Home Performance with ENERGY STAR criteria outlined in the Home Performance with ENERGY STAR Partnership Agreement. The graphic may be used in marketing and advertising materials to educate consumers or to show that a company provides services that clearly contribute to the integrated improvement of homes' systems as recommended by EPA's ENERGY STAR Program.

Any party delivering services as a participant in a partner-sponsored, whole-house improvement program using Home Performance with ENERGY STAR may use this graphic once it enters into an agreement with a program sponsor and once it agrees to abide by the terms of these guidelines. A program sponsor, that has signed the Home Performance with ENERGY STAR Partnership Agreement, may also use this graphic for program promotion.

CORRECT USE OF GRAPHIC 1 2

Use of the graphic includes Promotional and Educational material, and Web sites. Because

Home Performance with ENERGY STAR is a new service, it is recommended that the following language appear next to the Home Performance with ENERGY STAR marketing graphic, 1 2 where applicable, for educational purposes:

Working to deliver whole-house energy savings to improve comfort and help protect the environment.

OTHER PROMOTIONAL USES

Use of the graphic includes T-shirts, 3 hats, letterhead, business cards, and other stationery; and company-owned cars and vans, etc. 4 It must be placed in a general location that is not product-specific. It may not appear on products or product labels.

In order to avoid confusion in the marketplace, other ENERGY STAR marks should never be combined or displayed together with the Home Performance with ENERGY STAR Marketing Graphic. For example, if a Home Performance with ENERGY STAR program participant also sells ENERGY STAR qualified windows, the participant should choose to display either the certification mark next to a qualified window or the Home Performance with ENERGY STAR Marketing Graphic to advertise their participation, but not both.

www.webaddress.com

HOME PERFORMANCE WITH
ENERGY STAR

Working to deliver whole-house energy savings to improve comfort and help protect the environment.

2

3

4

USING THE ENERGY STAR HOME PERFORMANCE MARK

The program sponsor, as agreed to in the Home Performance with ENERGY STAR Partnership Agreement, is responsible for ensuring that program participants use the graphic consistent with the terms of these guidelines. Additionally, program sponsors should approve program participants' use of the Home Performance with ENERGY STAR Marketing Graphic in marketing and advertising campaigns as well as program facts that feature the ENERGY STAR name prior to final production or printing.

HORIZONTAL AND VERTICAL VERSIONS 1 2

There are two versions of the graphic—horizontal and vertical. Both include an ENERGY STAR Symbol block and a messaging block. The vertical mark is the preferred Home Performance with ENERGY STAR Marketing Graphic.

CLEAR SPACE 3

We require that a clear space of 0.333 (1/3) of the height of the graphic box within the label should surround the label at all times. No other graphic elements, such as text and images, can appear in this area.

MINIMUM SIZE 4 5

The graphic may be resized, but the proportions must be maintained. For legibility, we recommend that the graphic not be reproduced smaller in width than 0.375 inch (3/8") for print. Lettering legibility inside the graphic must be maintained on the Web.

PREFERRED COLOR 6

The preferred color for the Home Performance with ENERGY STAR Marketing Graphic is ENERGY STAR Blue (100% Cyan). Alternate versions in black or reversed out to white are allowed. The reversed out to white version may only be used on top of a dark background. The Web color equivalent of ENERGY STAR Blue is hex color #0099FF. If multicolor printing is available for advertising, product literature, or point of purchase materials, the Home Performance graphic should be printed in ENERGY STAR Blue. If ENERGY STAR Blue is not available, then the black can be substituted.

1

2

3

4

Minimum size for print applications is 3/8 inch wide

5

The minimum size for Web applications is that the legibility of the lettering inside the messaging block must be maintained

USING THE ENERGY STAR MARK INCORRECT USE OF THE HOME PERFORMANCE MARK

- Do not use on any product, home, or building to signify qualification with ENERGY STAR.
 - Do not use to imply that any product or any organization has met ENERGY STAR performance criteria.
 - Do not use to denote ENERGY STAR partnership or endorsement.
 - Do not use to imply that the government is funding ENERGY STAR financing and mortgages.
 - Do not use to imply that the government is funding or endorsing improvements or home improvement work.
 - Do not use in advertisements featuring services that are not directly related to participation in a sponsored Home Performance with ENERGY STAR program.
 - Do not display with other ENERGY STAR marks.
- Please:
1. Do not make the mark an outline. Do not use a white mark on a white background. Do not use the cyan blue mark on a blue background.
 2. Do not change the colors of the mark.
 3. Do not distort the mark in any way.
 4. Do not alter the lock up of the mark.
 5. Do not place the mark on a busy image.
 6. Do not rotate the mark.
 7. Do not separate any of the mark's elements.
 8. Do not substitute any part of the mark.
 9. Do not use any other typeface to replace part of the mark.
 10. Do not violate the clear space of the mark.
 11. Do not skew the mark.
 12. Do not change the size of the mark lock up.
 13. Do not use the old tagline "Money Isn't All You're Saving."
 14. Do not replace the approved wording.
 15. Do not apply the ENERGY STAR marks in an unapproved color.
 16. Do not let text run into the mark.

USING THE ENERGY STAR MARK OR NAME IN DOMAIN NAMES

Organizations, including partners, may not use the ENERGY STAR® trademark as part of an Internet domain name, without authorization from EPA. Only the EPA and DOE are allowed to use. The ENERGY STAR name is a registered trademark owned by the EPA. Only the EPA and DOE are allowed to use, or authorize the use of, the ENERGY STAR name. Public entities and state sponsors are allowed to use ENERGY STAR only if the organization has signed an agreement to this effect with EPA or DOE. The ENERGY STAR name is not allowed to be used in any other company name, product name, service name, domain name or Web site title.

EPA considers unauthorized use of ENERGY STAR as part of a domain name, to be an infringement of our trademark rights under the Lanham Act 15 U.S.C. §§ 1051 - 1129 (1999), including the Anti-cybersquatting Protection Act ("ACPA"), 15 U.S.C. § 1125(d)(1)(A). In addition, EPA considers use of ENERGY STAR as part of a domain name to be a violation of the Uniform Dispute Resolution Policy ("UDRP") that is incorporated into each domain name's registration agreement. EPA is readily available to answer any questions you may have on this policy.
