The DWA Offers New Training for Comprehensive Performance Evaluations

The Office of Ground Water and Drinking Water, the Office of Research and Development, and EPA Region 6 have developed a series of courses addressing comprehensive performance evaluations (CPEs). A CPE is an evaluation of a surface water plant to determine if the existing facility (design, operations, maintenance, and administration) is achieving optimized performance. Four courses are available:

- 1 CPE 101 – Fundamentals of CPEs.** This classroom training raises awareness and lays a foundation for understanding the importance of CPEs. This fundamentals course is the first step in building capacity and familiarizing States, technical assistance providers, and consulting engineers with the concepts of a CPE. Note that this course is not intended to train students to conduct a CPE. This basic training course addresses the following questions:

- What is a CPE?
- How does a CPE work?
- How do CPEs fit into the bigger picture (e.g., Area Wide Optimization Program)?
- Why is a CPE beneficial to the State and the water system?

States deciding to conduct their own CPEs would progress to CPE 201 and CPE 301, whereas States deciding to have a third party conduct the CPEs would progress to CPE 202.

- 1 CPE 201 – Introduction to CPEs.** The concepts behind conducting CPEs at surface water treatment plants are introduced through a one-day series of classroom presentations, workshops, followed by a three-and-a-half day field exercise at a surface water treatment plant. After the course, a full CPE report is produced based on the findings of the field exercise. Trainees are guided through the process by experienced instructors. The trainees help the instructors with the investigation at the surface water plant and present some of the group's findings to the plant staff at an exit meeting at the end of the course.

- 1 CPE 202 – CPE Oversight and Review.** This course covers the components of a CPE in more detail, helps students establish a procedure to approve third parties, and trains students to understand what to look for in reviewing a CPE report. One day of classroom training is followed by a two-and-a-half day field exercise at a surface water treatment plant.

- 1 CPE 301 – CPEs (Progressive).** As a follow-up to CPE 201—Introduction to CPEs—up to six trainees are facilitated through two additional drinking water system CPEs. After completion of these additional CPEs, in addition to the one CPE performed in the Introduction to CPEs training, the trainee will independently be able to conduct a CPE. Each session consists of three-and-a-half days of field work at a drinking water system and one report. In these evaluations, the

The Drinking Water Academy Offers UIC Training

From October 15 to 18, 2001, the Drinking Water Academy (DWA) will hold two underground injection control (UIC) training courses in Washington, DC. On October 15, the DWA will present *Introduction to the Underground Injection Control Program*. This training module is intended for non-technical audiences. It describes the foundation

of the UIC program; discusses the framework of the UIC program; explains the five classes of wells and their construction; and explains the challenges facing today's UIC programs.

On October 16-18, DWA will present a pilot of *Introduction to UIC Permitting*. This course, which is for technical staff, will introduce inexperienced federal or State permit writers to the requirements for UIC permitting and their responsibilities in reviewing the permit application and developing permit conditions. The two-and-a-half-day course, which includes class discussions and exercises, covers these topics:

- 1 Site evaluation, including site and injectate characteristics.
- 1 Monitoring and mechanical integrity testing.
- 1 Formation testing.
- 1 Area of review.
- 1 Injection dynamics.
- 1 Well construction.
- 1 Financial responsibility.
- 1 Public participation.

The DWA Holds Its Annual Advisory Board Meeting

The Drinking Water Academy Advisory Board met on July 23 and 24 in Reno, NV for its annual meeting. The Board was welcomed by Galen Denio, Nevada Bureau of Health Protection Services, who provided a State perspective on training needs and approaches. The agenda for the meeting addressed a number of topics, including the FY 2001-2002 training schedule, recent international activities, comprehensive performance evaluation training, sanitary survey training, and training development priorities for FY 2002. The Advisory Board also had lively discussions about distance learning and setting training standards. Both are projects the Board will undertake during FY 2002.

The meeting ended with a presentation of plaques by Jamie Bourne to members of the Advisory Board. He thanked them for their excellent work on behalf of the DWA. Mario Salazar also presented Jamie with a plaque from the OGWDW members of the Advisory Board in recognition of his good leadership. 1

Both courses will be presented from 8:30 a.m. to 5 p.m. each day in Room 2138 of EPA's Ariel Rios Building, 1200 Pennsylvania Avenue, N.W., Washington, DC. For more information about the training courses or to register to attend, contact Mario Salazar at (202) 260-2363 or salazar.mario@epa.gov. 1

DWA Offers New CPE Training (Continued from Page 1)

trainees conduct the entire exit meeting and write the reports following the evaluations. With each CPE, the trainee will progressively take on more of the responsibility of conducting the CPE. Instructors are on hand to facilitate, guide, answer questions and keep the process on track.

CPE 202 was recently piloted in EPA Region 5. Region 5 federal and State staff and the Chicago Office of the Army Corps of Engineers participated in the training. The classroom day was held at the Illinois EPA offices in Elgin and included development of individual State CPE and Area Wide Optimization Program procedures. The field demonstration was held at the

Kankakee water treatment plant, which was built in 1886 and upgraded several times since. A final CPE report is being prepared. It will be submitted to the water plant and a follow-up visit will be held.

For more information on the CPE 101 (Fundamentals) or CPE 202 (Oversight and Review) course, contact Nicole Foley at (202) 260-0875 or foley.nicole@epa.gov. For more information on the CPE 201 (Introduction) or CPE 301 (Progressive) courses, contact Bill Davis at (214) 665-7535 or davis.williamh@epa.gov. 1

The DWA Establishes a Sanitary Survey Web Site

The Drinking Water Academy has established a Web site to provide a focal point for sanitary survey training and other resources that EPA offers.

A sanitary survey is an on-site review of the water source, facilities, equipment, operation, and maintenance of a public water system for the purpose of evaluating the adequacy of such source, facilities, equipment, operation, and maintenance for producing and distributing safe drinking water. Sanitary surveys are becoming an increasingly important means of educating system operators and identifying systems that need technical or capacity development assistance.

The Drinking Water Academy provides sanitary survey training to upgrade and maintain the ability of inspectors to conduct comprehensive, technically sound sanitary surveys of small water systems. EPA also offers a training manual, guidance materials, and videos to support sanitary surveys. These resources are accessible from the Web site, or can be ordered using the form on the Web site. Visit the sanitary

survey Web site at <http://www.epa.gov/safewater/dwa/sanitarysurvey.html>.

The Learner's Guide for Conducting Sanitary Surveys is available in a Spanish translation. To obtain a copy, contact Mario Salazar at (202) 260-2363 or salazar.mario@epa.gov.

EPA Photo

Sanitary surveys have been a critical component of State drinking water programs for decades. They are used to prevent and correct sanitary deficiencies and are indispensable for ensuring the delivery of safe water on a sustainable basis.

Training Course Schedule

Course Title	Audience	Date Scheduled	Location	Contact
Risk Communication under the Safe Drinking Water Act (pilot)	State and Regional drinking water staff, local health department staff	Aug. 8 & 9, 2001	Morgantown, WV	Rick Rogers (215) 814-5711 rogers.rick@epa.gov
Phase II/V Chemicals and Radionuclides Rules	State and federal drinking water staff	Aug. 9 & 10, 2001	Dallas, TX	Ronald Bergman (202) 260-6187 bergman.ronald@epa.gov
Risk Communication under the Safe Drinking Water Act (pilot)	State and Regional drinking water staff, local health department staff	Aug. 15 & 16, 2001	Washington, DC	Jamie Bourne (202) 260-5557 bourne.james@epa.gov
Phase II/V Chemicals and Radionuclides Rules	State and federal drinking water staff	Aug. 16 & 17, 2001	Denver, CO	Ronald Bergman (202) 260-6187 bergman.ronald@epa.gov
SDWIS/STATE Initial User Training	State and EPA drinking water staff who use SDWIS/STATE	Aug. 21-23, 2001	Jefferson City, MO	Darrell Osterhaut (573) 751-1187
		Sept. 11-13, 2001	Trenton, NJ	Linda Friedman (609) 292-5550
		Sept. 25-27, 2001	Little Rock, AR	Karen Howard (501) 661-2543
		Oct. 16-18, 2001	Frankfort, KY	Vicki Ray (502) 564-3410
		Oct. 30-Nov. 1, 2001	Denver, CO	Robert Miller (303) 692-3587
SDWIS/STATE System Administration Training	State and EPA drinking water staff who use SDWIS/STATE	Aug. 14-16, 2001	Frankfort, KY	Vicki Ray (502) 564-3410
		Aug. 28-30, 2001	Denver, CO	Robert Miller (303) 692-3587
Sanitary Survey Training	Alaska State drinking water staff	Aug. 27-30, 2001	Alaska	Bill Davis (214) 665-7536 davis.williamh@epa.gov
Sanitary Survey Training	Colorado State drinking water staff	Aug. 28-31, 2001	Denver, CO	Bill Davis (214) 665-7536 davis.williamh@epa.gov
Surface Water Treatment Rule, Total Coliform Rule, IESWTR, and Stage 1 DBPR	EPA and State drinking water staff, training providers and water system operators	Aug. 14-16, 2001	New York, NY	Ann Hanger (202) 260-6781 hanger.ann@epa.gov
Sanitary Survey Troubleshooter's Training	State drinking water staff	Aug. 20-23, 2001	Cumberland, MD	Rick Rogers (215) 814-5711 rogers.rick@epa.gov
Risk Communication under the Safe Drinking Water Act	State and Regional drinking water staff, local health department staff	Sept. 5 & 6, 2001	Middletown, PA	Rick Rogers (215) 814-5711 rogers.rick@epa.gov
CPE Oversight and Review (CPE 202)	State staff responsible for establishing and overseeing a third-party program	Sept. 10-13, 2001	Seattle, WA	Nicole Foley (202) 260-0875 foley.nicole@epa.gov
UIC Inspector Training	Federal and State UIC inspectors	Sept. 10-14, 2001	Bakersfield, CA	Steve Platt (215) 814-5464 platt.steve@epa.gov

Continued on page 5.

Training Course Schedule (Continued)

Course Title	Audience	Date Scheduled	Location	Contact
SDWIS/FED Data Entry	Federal and State personnel whose responsibilities include entering data into the SDWIS/FED system	Sept. 17-21, 2001	Boston, MA	Joe Lewis (202) 260-7079 lewis.joe@epa.gov
SDWIS/STATE Advanced User Training	State and EPA drinking water staff who use SDWIS/STATE	Sept. 18-20, 2001	Dover, DE	Anita Beckel (302) 739-5410
		Oct. 2-4, 2001	Trenton, NJ	Linda Friedman (609) 292-5550
Introduction to SDWA and the Public Water System Supervision, Underground Injection Control, and Source Water Protection Programs	EPA Region 8 State and federal drinking water staff	Sept. 18-20, 2001	Denver, CO	Marty Swickard (303) 312-7021 swickard.marty@epa.gov
Sanitary Survey Training	Utah State drinking water staff	Sept. 18-21, 2001	Salt Lake City, UT	Bill Davis (214) 665-7536 davis.williamh@epa.gov
IESWTR and Stage 1 DBPR	State and federal drinking water staff	Sept. 20-27, 2001	Alaska	Nicole Foley (202) 260-0875 foley.nicole@epa.gov
Phase II/V Chemicals and Radionuclides Rules	State and federal drinking water staff	Sept. 25-26, 2001	Chicago, IL	Ronald Bergman (202) 260-6187 bergman.ronald@epa.gov
Introduction to SDWA and the PWSS Program	Montana State drinking water staff	Sept. 25, 2001	Helena, MT	Marty Swickard (303) 312-7021 swickard.marty@epa.gov
Sanitary Survey Training	Guam State drinking water staff	September 2001	Guam	Bill Davis (214) 665-7536 davis.williamh@epa.gov
Managerial and Financial Capacity Development	EPA Region 8 federal and State drinking water staff	September or October 2001	Denver, CO	Marty Swickard (303) 312-7021 swickard.marty@epa.gov
Phase II/V Chemicals and Radionuclides Rules	State and federal drinking water staff	Oct 2 & 3, 2001	Waltham, MA	Ronald Bergman (202) 260-6187 bergman.ronald@epa.gov
Risk Communication under the Safe Drinking Water Act	EPA Region 8 federal and State drinking water staff	Oct. 11 & 12, 2001	Denver, CO	Marty Swickard (303) 312-7021 swickard.marty@epa.gov
Introduction to the UIC Program	Federal and State drinking water staff new to the UIC program, or who want a non-technical overview of the UIC program	Oct. 15, 2001	Washington, DC	Mario Salazar (202) 260-2363 salazar.mario@epa.gov
Risk Communication under the Safe Drinking Water Act	Idaho State drinking water staff and water system operators	Oct. 15 & 16, 2001	Boise, ID	Jeff Long Idaho Rural Water (208) 343-7001
Introduction to UIC Permitting (pilot presentation)	New or inexperienced federal and State UIC permit writers with a technical background	Oct. 16-18, 2001	Washington, DC	Mario Salazar (202) 260-2363 salazar.mario@epa.gov
