Washington, DC 20460

Subject: Notification of a Consultation on the Development of a
Strategy for addressing Indoor Air Issues

Dear Ms. Browner:

The Integrated Human Exposure Committee (IHEC) of the Science Advisory Board (SAB) met on July 22, 1997, to conduct a consultation with staff from the Office of Air and Radiation on the Agency's proposed approach to the development of a strategy for addressing indoor air issues. The SAB has developed the consultation as a mechanism to advise the Agency on technical issues that should be considered in the development of regulations, guidelines, or technical guidance before the Agency has taken a position. A consultation is conducted under the normal requirements of the Federal Advisory Committee Act, which include advance notice of the public meeting in the *Federal Register*.

As is our customary practice, there will be no formal report from the SAB as a result of this consultation, nor do we expect any formal response from the Agency. However, the Committee looks forward to conducting a formal review of the strategy for addressing indoor air issues sometime in the future.

Sincerely,

/signed/

Dr. Genevieve M. Matanoski, Chair
Executive Committee
