

Water and Wastewater All-Hazards Boot Camp Training

I WANT YOU TO BUILD RESILIENCE

EPA's Water and Wastewater All-Hazards Boot Camp Training is a computer-based training for utilities that focuses on emergency planning, response, and recovery activities and how they fit into an all-hazard management program. The interactive training includes video testimonials, as well as links to helpful tools and resources to give utilities a head start on building resilience. Check with your state program for CEUs!
