TO: Mr. Craig A. Harvey, Project Officer
Emission Control Technology Division
Environmental Protection Agency
2565 Plymouth Road
Ann Arbor, MI 48105

FROM: Daniel A. Montalvo and Charles T. Hare
Department of Emissions Research
Southwest Research Institute
6220 Culebra Road
San Antonio, TX 78284

SUBJECT: Final Letter Report for Work Assignment No. 2-17, Contract 68-03-3192, "Aftermarket Catalyst Collection," SwRI Project 03-7774-017

This Work Assignment was conducted to locate and collect ten (10) passenger car and light-duty truck new aftermarket catalysts that had been in use for at least a few thousand miles. EPA will use these catalysts to verify that such aftermarket catalysts control emissions as effectively as OEM catalysts used in vehicle certification, and continue to do so in use. The ten catalysts were to be collected from vehicle owners in the Houston, Texas area. Each catalyst procured was to be inspected visually and by shaking in order to provide a brief description of its condition. A corresponding fuel sample taken from each vehicle's gas tank was to be analyzed for lead by atomic absorption.

Mr. Harvey provided SwRI a list of eligible vehicle owners prepared by the Texas Department of Public Safety (TDPS). The list, as presented in Appendix A to this report, indicates the status of various I/M inspection items as determined on their vehicles by inspection stations (Mr. Harvey was initially assured by the TDPS that all vehicles in the list already had replacement catalysts). SwRI incorporated into the left hand margin of the list a three-digit identification number designating each owner with vehicle. A total of 667 vehicle owners were included in the list and represented both private and business owners.

Based on the TDPS vehicle list, SwRI prepared a solicitation letter to mail to each vehicle owner. A sample copy of the solicitation letter is found in Appendix B. The solicitation letter basically described the research nature of the project, explained the incentives (part replacement and/or cash award) and arranged for catalyst replacement if the owner was interested in participating. The cash award and replacement of the aftermarket catalyst was offered contingent on the vehicle meeting certain requirements specific to the needs of the Work Assignment.

SAN ANTONIO, TEXAS
WITH OFFICES IN HOUSTON, TEXAS, AND WASHINGTON, D.C.

Persons responding to the solicitation letter were directed to call Mr. Bobby Okuda of Intercol, 15402 Vantage Parkway East, Suite 322, Houston, TX 77032. Intercol, with direct cooperation of Mr. Okuda, has assisted SwRI on Work Assignments No. 11 and 2-16 of this contract. A copy of the inspection form used by Mr. Okuda to conduct the preliminary inquiry with the vehicle owner, and also for subsequent use in Intercol's confirmatory inspection and catalyst conversion is found in Appendix C.

Using the inspection form in Appendix C, Mr. Okuda at minimum determined the following items:

- a) make and model of vehicle
- b) approximately how long (and how many miles) the replacement catalyst has been in use
- c) where the catalyst was replaced (dealer or private shop)
- d) if it is OEM or aftermarket catalyst (if owner knows)
- e) whether leaded fuel has been used since the catalyst was installed.

If for some reason the vehicle or catalyst did not meet the needs of this Work Assignment, the owner was so informed and thanked for acknowledging the solicitation. One reason for disqualification was that the vehicle had an OEM or recycled replacement catalyst instead of a new aftermarket catalyst. Other disqualifications would likely be due to owner never having actually replaced the catalyst, or to the replacement catalyst having fallen off the car and been lost or seriously damaged.

Once an owner was invited to bring his or her vehicle to Intercol, Mr. Okuda visually inspected the catalyst and recorded its condition plus the make, model, model year, and odometer reading of the vehicle. If for some reason (as stated earlier) the vehicle was disqualified at this inspection, the owner was told why the disqualification occurred, and then was thanked and given an incentive of \$50.00 for the time and effort contributed.

A vehicle accepted by Intercol, on the other hand, was further inspected for the presence of lead in the tailpipe, on the sparkplug, and on the EGR valve pintle using the Plumbtesmo test. A sample of fuel was drawn from the fuel tank for later use in atomic absorption lead analysis at SwRI. If a new OEM or EPA-approved aftermarket catalyst was readily available, Intercol picked it up and installed it on the vehicle. If not, Intercol ordered the replacement OEM or EPA-approved aftermarket catalyst, and instructed the vehicle owner to return when notified in order to complete the catalyst conversion (odometer mileage was also noted at time of conversion). At this point, the owner was provided with proof of purchase of the replacement catalyst, thanked, and given a \$100.00 incentive for his or her cooperation.

Of the 667 solicitation letters mailed, 52 letters were returned to SwRI by the post office and classified undeliverable because of either wrong address, no forwarding order in file, or expired forwarding order. One letter was returned to SwRI by a vehicle owner, and resubmitted with requested vehicle

identification. Another letter indicated a change of address to Alabama and was not resubmitted. One addressee called SwRI and was provided further description of her vehicle, since she owned several vehicles.

During the course of this Work Assignment, Intercol received 55 phone calls from interested vehicle owners responding to the solicitation letters. The acceptance/rejection classification of these vehicles, as reported in their individual report forms prepared by Intercol, is found in Appendix D. A summary of the vehicle classification in Appendix D is as follows:

- One (1) vehicle accepted for catalyst conversion (Vehicle No. 561)
- Forty-five (45) vehicles rejected at preliminary inquiry because they still had original OEM catalysts installed
- One (1) vehicle rejected at confirmatory inspection because it had new replacement OEM catalyst installed
- Six (6) vehicles rejected because owners sold the vehicles to other parties
- One (1) vehicle rejected because no catalyst history was available
- One (1) vehicle rejected because it was wrecked

The conversion of the aftermarket catalyst with a new OEM catalyst was completed on Vehicle No. 561 by Intercol on September 26, 1986. At the completion of the aftermarket catalyst conversion, Mr. Okuda noticed that the catalyst was basically an empty canister shell with no evidence of an inner catalytic material or structure ever being present. Subsequent SwRI examination of the catalyst in San Antonio confirmed that the unit was indeed an empty canister with dimensions measuring 10 inches long by 6 inches wide and 3 1/2 inches thick.

An individual test report was prepared for Catalyst No. 561 in Appendix E. Included in the report are copies of the purchase receipts for the new OEM replacement catalyst and the empty canister of the aftermarket catalyst. The receipt for the aftermarket catalyst was issued to Vehicle Owner No. 561 identified in the receipt and Appendix A as Mrs. Carolyn Jean Cooper, 2430 Hartwick St., Houston, Texas 77093. Her phone number is (713) 449-4647. Mrs. Cooper, as far as Mr. Okuda can determine, assumed that her car had been equipped with a legitimate aftermarket catalyst by Meineke.

Catalyst No. 561 tested negative with the Plumbtesmo Test at its inlet and outlet ports. Also testing negative was Vehicle No. 561 at the tailpipe and spark plug. The EGR valve pintle was not tested for lead contamination because of its unaccessibility. Lead content of the fuel tank sample from the same vehicle was 0.001 g/gal as determined by atomic absorption. This amount of lead is within the range of lead concentrations found in unleaded gasoline.

III. QUALITY ASSURANCE

As specified by the Project Officer, the atomic absorption lead value determined at SwRI for the fuel tank gasoline sample will be evaluated for accuracy by EPA using the lead content value also determined for the EPA reference sample by SwRI. The lead concentrations are reported in the individual catalyst test report for Vehicle No. 561 in Appendix E of this report.

IV. CATALYST SHIPMENT TO EPA

At the termination of Work Assignment No. 2-17, the single catalyst (No. 561) procured in this Work Assignment was shipped by Motor Freight to the attention of the Branch Technical Representative at the EPA in Ann Arbor, Michigan. The catalyst was identified with the corresponding vehicle number, Work Assignment Number, and Contract Number.

**SWRI SOLICITATION LETTER
TO OWNERS OF VEHICLES
WITH AFTERMARKET CATALYSTS**

SOUTHWEST RESEARCH INSTITUTE

POST OFFICE DRAWER 28510 • 6220 CULEBRA ROAD • SAN ANTONIO, TEXAS, USA 78284 • (512) 684-5111 • TELEX 76-7357

May 19, 1986

SwRI I.D. No.

Dear ,

The Department of Emissions Research of Southwest Research Institute (SwRI) at 6220 Culebra Road, San Antonio, Texas 78284 is presently under contract with the Environmental Protection Agency (EPA) to collect and perform tests on new aftermarket catalysts from passenger and light-duty trucks in the Houston, Texas area. EPA will then use the aftermarket catalysts to obtain information concerning the effectiveness of these catalysts compared to original equipment manufacturer (OEM) catalysts. In the interest of effective inspection and maintenance (I/M), EPA feels it is important to verify that such aftermarket catalysts control emissions as effectively as the OEM catalysts used in vehicle certification and continue to do so in use.

Since the Texas Department of Public Safety (TDPS) has identified your vehicle as one equipped with an aftermarket catalyst, you are hereby invited to participate in the EPA/SwRI program. Your actual participation will be contingent on your vehicle meeting certain conditions.

If your new replacement aftermarket catalyst has been in use for 3000 miles or more and you wish to participate, we are requesting that you personally contact Mr. Bobby Okuda of Intercol at (713)-590-1751 to arrange for his confirmatory inspection of your vehicle. His inspection facility is located at 15402 Vantage Parkway East, Suite 322, Houston, Texas 77032. When you call Mr. Okuda, please identify yourself by name and the SwRI Identification Number listed under your name and address on this letter.

Once you have been invited to bring your car to Intercol, Mr. Okuda will visually inspect the catalyst and record its condition. If for some reason, the vehicle is disqualified at this inspection, you will be told why the disqualification occurred and you will also be given \$50 for the time and effort contributed.

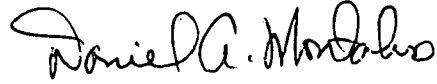

If your vehicle is accepted by Intercol, on the other hand, it will have its catalyst replaced with either a new OEM or EPA-approved aftermarket catalyst if readily available. At no charge to you, Intercol will pick it up and install it on the vehicle along with any other exhaust system component needed to complete its installation. If the replacement catalyst is not available, Intercol will order one and instruct you to return when notified in order to perform the catalyst conversion. Upon completion of catalyst conversion, your car will be returned to you with proof of purchase of the replacement catalyst, and you will also be given \$100 for your cooperation in this program. Intercol will retain the used replacement catalyst for its subsequent study by SwRI.

SAN ANTONIO, TEXAS
WITH OFFICES IN HOUSTON, TEXAS, AND WASHINGTON, D.C.

We anticipate your cooperation on this program and are grateful for your participation.

Sincerely,

A handwritten signature in black ink that reads "Daniel A. Montalvo". The signature is written in a cursive style with a large initial 'D'.

Daniel A. Montalvo
Research Physicist
Department of Emissions Research
